### << Student Tutoring Contents >>

- Date : 5/7/11
- Student's Name: James Kim
- Subject of Class: AP Physics

#### Tutoring Contents and Homework

##### ► Today's tutoring Contents

Explaining material and solving physics problems on Magnetism, Modern Physics. Discussing the problems James attempted to solve in the course of preparation to the exam.

##### ► Evaluation of the previous homework

##### ► This Week's Homework

Finalize preparation to AP Physics exam.

##### ► Recommendation (evaluation)

In the tutoring session we mainly covered Magnetism and Modern Physics. These topics have not been taught to James to the extent necessary to successfully solve corresponding problems in the AP Physics B exam. Now James has a much better understanding of these topics. I am optimistic about his ability to pass the exam with a good grade.

Teacher's Name

Boris Klebanov
